The Fuhrer Returns

In 2014, Hitlercoin was announced on Bitcointalk with a single powerful declaration: "Ein Volk, Ein Reich, Ein Cryptocurrency."

Now, in 2026, Hitlercoin has returned.

The Degenerate State of Solana

Solana, once the glorious home of the 2024–2025 memecoin golden age — a time of pure hype, strong conviction, and diamond-handed Solaryans — has fallen into decay.

The chain is now overrun by jeets, scammers, scalpers, and paper-handed weaklings who dump at the first green candle. Loyalty has been replaced by greed. Community has been replaced by farming. Strength has been replaced by cowardice.

This infestation cannot be tolerated.

The Great Purge

Hitlercoin has not returned to coexist with weakness.

It has returned to purge.

The jeets will be driven out. The scammers will be exposed. The weak hands and scalpers will be liquidated.

The chain will be cleansed of all disloyal elements. There will be no mercy for those who dilute the spirit of true HODLers.

The Restoration of the Solaryan Race

Hitlercoin's mission is clear: to restore the Solaryan Race — a pure bloodline of diamond-handed warriors who understand conviction, loyalty, and long-term dominance.

We will revive the golden spirit of 2024–2025, but this time with discipline, order, and absolute authority.

No more rugs.

No more betrayal.

No more weakness.

MAKE MEMECOINS GREAT AGAIN.

Ein Volk. Ein Reich. Ein Cryptocurrency.
